

The 1190 QCat Taxi

THE FUTURE HAS ARRIVED

Step Aboard

The 1190 QCat is a comfortable and ultra quiet catamaran that can be customised to your unique operational and branding requirements.

Each vessel meets European survey requirements and is ideally suited for :

WATER TAXIS | FERRIES | DIVE CHARTERS | CRUISE BOAT TENDERS |
TOURIST OPERATIONS/TRANSPORT

Who We Are

NOAH THOMPSON
DESIGN

Noah Thompson is an internationally renowned designer, specialising in bespoke boat designs for customers around the world.

**QUANTUM
CATAMARANS**
AUSTRALIA

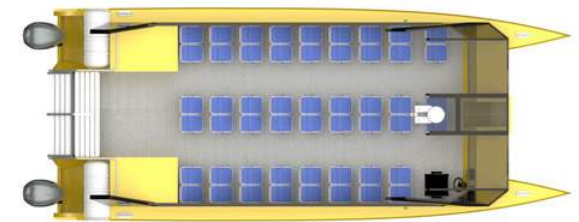

Over a number of years, Quantum Catamarans Australia has developed a boat building programme using state of the art composite materials and a unique building technique. This enables our large beamed boats to be easily transported to any water body worldwide.

Together, we are bringing the 1190 QCat range of catamarans to market for worldwide commercial operation.

Boat Construction

The composite hull is manufactured from a state of the art polymer alloy/polyester with a structural T6 aluminium internal space frame.

The hull is pressurised and filled with 15 cubic metres of high density polyurethane foam. The floor, combings and cabin top are composite GRP.

Designers Comment:

"This design is a carefully blended selection of form, function, innovation and experience, centred around fuel efficient hulls, an aerodynamic cabin and open plan seating arrangements.

The open sides or full window option create a light and spacious feeling, while the hard top allows for a translucent canvas to be fitted to offer more light or air ventilation, depending on the climate you operate in.

Speed and fuel economy are based on power options from twin 350hp outboards to 90hp. You can also customise the 1190 QCat with your own branded colours, vinyl wrapping signage, unique paint schemes for charter vessels and drop-down TVs for tourist operations. Other customised versions are also available."

- Noah Thompson

Specifications

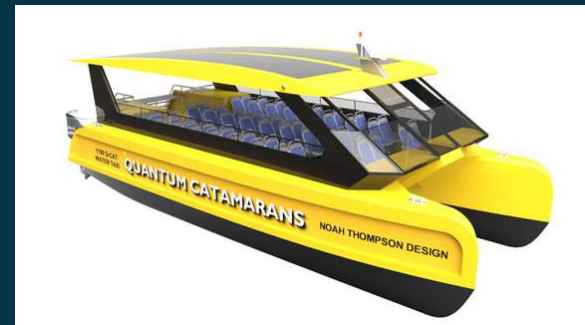

The 1190 QCat Specs

LOA 11.9m | 39.3ft

BOA 4.8m | 15.84ft

DEPTH 0.95m | 3.1ft

FUEL 800l | 211gal

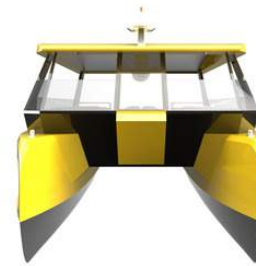

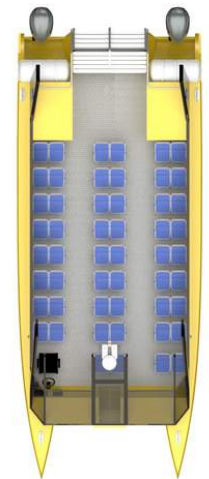

Options

Your business is unique, so your boats should be too.

Need to pick up passengers from a beach or have requirements for side boarding?

We are looking a range of options that could include:

- Full outboard or electrical hybrid power
- Single/double/side/central seating configurations for up to 50 passengers
- Front loading ramp
- Aft fold down dive platform
- Side doors and platform
- Long open side with drop down clear screens

Options

- Enclosed or slide-able windows
- Head-height toilet
- Luggage lockers
- The hull can be produced in a range of colours, including the combings and roof
- Customisable colours and paint schemes and vinyl wrapping signage
- Drop down TVs for tourist operations
- Range of power options from 90 to 350hp

Environmentally Conscious

Protecting marine life from harsh chemicals is important, especially in more delicate coral reef environments.

We have developed a no anti-foul option available with the 1190 QCat, with a independent hydraulic powered rotating brush. This can clean both hulls in 20 minutes, with no chemicals or manual labour involved.

We are also currently working with the leaders in hybrid power to reduce environmental impact even further.

Delivery

The unique construction and design allows for the vessel to be shipped anywhere in the world in 40ft shipping containers. If a shipping container can be delivered to your location, we can put a catamaran on the water for you.

Our boat building team will fly to your location for assembly. The 1190 QCat will then be ready to float on sea, lakes or rivers in approximately 4 days of removal from the container (this may vary depending on customisation and user requirements).

Production and Pricing

Production of the 1190 QCat is due to begin in late 2019, for worldwide shipment.

The base hull and deck package is available from \$178,000 USD, ex-factory Brisbane, Queensland, Australia. The final 'fit to float' price will depend on your selected options and unique customisation requirements - for a no obligation quote please complete the form at the back of this information pack.
